PRACTICAL WORK PRESENTATION

Brevo Email Marketing

Evidence-based email marketing, automation, domain authentication, and customer retention.

Presented by • Quratulain Shakeel

1. Introduction to Gul Bakes

A modern bakery brand

Gul Bakes is an online bakery project offering cakes, cupcakes, macarons, desserts, and bakery items through a connected digital experience.

- Customers discover products through social media.
- Shopify presents products and supports ordering.
- WhatsApp provides direct customer support.
- Brevo manages email communication and retention.

2. Project Objective & Scope

What the complete Gul Bakes project was designed to achieve

Project Objective

- Build a professional online bakery presence.
- Create consistent branding and product presentation.
- Increase customer discovery and communication.
- Connect marketing with the Shopify store.

Project Scope

- Shopify store development and customization.
- Canva branding and content design.
- Facebook, Instagram, and WhatsApp communication.
- Brevo campaigns, automation, and testing.
- Domain setup and performance review.

One connected system: attract → communicate → convert → retain

6. What is Brevo?

Brevo

Brevo is a cloud-based CRM, email marketing, and automation platform.

For Gul Bakes, it stores contacts, supports subscriber lists, authenticates the sending domain, designs branded campaigns, creates automated journeys, sends tests, and reviews email activity.

3.

BREVO CONTACTS

Email audience setup

Private details removed

C

PRACTICAL EVIDENCE

Screenshot: Brevo contact list containing visible email records.

Result: A contact database is present.

EXPLANATION

Brevo is a digital communication and email-marketing platform that can be used to manage contacts, create email campaigns, configure automation, and monitor email activity.

Brevo Contacts is the area where customer or subscriber contact records are stored.

A contact database is important for email marketing because campaigns and automated communication require an organized audience.

Figure 46.1 — Brevo contact list containing visible email records.

14. Brevo Domain Authentication

Connecting and verifying the Gul Bakes sender domain

D

PRACTICAL EVIDENCE

Authenticated sending identity

Brevo provides DNS records that are added through the domain provider. Verification supports professional and authorized email sending.

WORKFLOW

- Open domain authentication.
- Copy the required records.
- Add them to DNS settings.
- Return to Brevo and verify.

gulbakes.store

DNS records for domain authentication

15. Email Customization

The campaign and editor are explained with their own proof

PRACTICAL EVIDENCE

Screenshot: Brevo email editor showing the Gul Bakery email layout and editable content.

Result: Email content can be designed and reviewed before sending.

SCREENSHOT EXPLANATION

The Brevo Email Editor is a visual environment used to create and customize email campaigns.

It allows the user to arrange content blocks, text, images, buttons, and other email elements.

16. Brevo Automation

Email Connecting and verifying the Gul Bakes sender domain

A

PRACTICAL EVIDENCE

Screenshot: Brevo automation activation dialog showing an email workflow.

Result: An automated email workflow is configured.

EXPLANATION

Brevo Automation allows businesses to create automated communication workflows based on predefined triggers or customer actions.

For GulBakes, automation can support customer communication after a contact enters

17. Testing

Email testing

PRACTICAL EVIDENCE

Screenshot: Brevo test-message screen showing a processed email step.

Result: Email testing is part of the campaign setup process.

EXPLANATION

Test messages are used before sending a campaign to the complete audience.

Testing helps verify:

- Email appearance
- Content
- Links
- Formatting
- Call-to-action elements
- Overall layout

18. Final Result / Outcome
